

SAP HANA® AGENDA

| TIME | TOPIC |
|------------------------|--|
| 7:30 a.m. – 8:00 a.m. | Breakfast |
| 8:00 a.m. – 9:00 a.m. | <p>Building the Business Case for Suite on SAP HANA</p> <p>This opening session will set the stage for those eager to make the move to Business Suite on SAP HANA—the essential first step to SAP S/4HANA Enterprise Management. Attendees will hear about customer use cases, optimized business processes, and real-world value-add scenarios to help build the business case for Suite on SAP HANA. Already have your project justified? Leverage this session to validate your assumptions and continue to fine-tune your justification for the move to Suite on SAP HANA. In this session, attendees will:</p> <ul style="list-style-type: none"> • Learn about the migration path from Business Suite on Relational Database Management System (RDBMS) to Business Suite on SAP HANA with the eventual target of SAP S/4HANA Enterprise Management. • Understand the value-drivers behind the technical innovation of Business Suite on SAP HANA. • Hear how other customers leveraged SAP HANA to further reduce their SAP Total Cost of Ownership (TCO). • Gain a better understanding of benefits and risks of performing a migration to Business Suite on SAP HANA. |
| 9:00 a.m. – 10:15 a.m. | <p>Project Scoping and Planning for Success</p> <p>Running an effective Business Suite on SAP HANA project starts with project scoping and planning. In this session, attendees will learn how to leverage tools provided by SAP to accurately forecast the time and resources required to perform the SAP HANA migration. Attendees will walk through detailed example project plans, validating prerequisites using the SAP Service Marketplace, and verifying ERP add-on and third-party compatibility. This session will cover the use of SAP Solution Manager 7.1 (& 7.2) to aid the estimation of effort required for development and test cycle execution.</p> |

SAP HANA® AGENDA

| | |
|--------------------------------|---|
| | <p>Attendees will:</p> <ul style="list-style-type: none">• Understand the SAP Rapid Deployment Solution for Suite on SAP HANA migrations.• Come away with real-world project charters, project, communication, risk, and cutover plans for a Suite on SAP HANA migration.• See how SAP Solution Manager can estimate the impacted objects and determine the correct test cycle scope for your organization's risk tolerance.• Talk about release planning and determining target product versions.• Put into practice the six steps of the design- thinking method as used by SAP: Understand, Observe, Derive Insights, Ideate, Prototype, and Test• Brainstorm solutions while separating needs versus wants, and required functionality versus nice-to-have add-ons |
| 10:15 a.m. – 10:30 a.m. | Break |
| 10:30 a.m. – 11:00 a.m. | <p>Custom Code Analysis and Unicode</p> <p>When moving to Business Suite on SAP HANA, we must first SAP HANA-compliant. Regardless of your current SAP ERP release, SAP provides the tools required to perform a detailed ABAP code analysis before the migration so customers will know what objects will need to be remediated. Not Unicode compliant? Attendees will learn about the planning activities we can execute now in order to be prepared for the Suite on SAP HANA migration. Attendees will:</p> <ul style="list-style-type: none">• Explore the SAP Code Inspector and the SAP-provided templates to perform an analysis of all customer-created objects.• See the Unicode Check tool available with any release of SAP ERP.• Walk through examples of ABAP code that is not SAP HANA-compliant. |
| 11:00 a.m. – 12:00 p.m. | <p>Architecting Suite on SAP HANA</p> <p>There are numerous options for designing your Suite on SAP HANA landscape. In this session, we will cover the basics of HANA architecture, capabilities, and best practices. Attendees will learn about SAP's Tailored Data Center Integration (TDI) approach to deploying SAP HANA within a customer's existing data center.</p> |

SAP HANA® AGENDA

| | |
|--------------------------------------|--|
| | <p>When should I use a certified SAP HANA appliance? When should I go TDI? And what are my options for High Availability and Disaster Recovery?</p> <p>In this session, attendees will:</p> <ul style="list-style-type: none"> • See example landscapes from customers who have deployed Suite on SAP HANA. • Understand the difference between TDI and certified appliances. • Hear about the disaster recovery options for SAP HANA. <p>Learn more about the relationship with other SAP components (BW, SCM, Portal, PI, etc.) when deploying Business Suite on SAP HANA.</p> |
| <p>12:00 p.m. – 1:00 p.m.</p> | <p>Lunch</p> |
| <p>1:00 p.m. – 2:15 p.m.</p> | <p>Suite on SAP HANA Migration Tools</p> <p>SAP provides the Software Lifecycle Toolset to assist the migration to Suite on SAP HANA. Decisions we make on target software component versions will dictate the tools we will use during the technical migration from any database to SAP HANA. In this session, attendees will learn about the Software Update Manager, which enables both the patching of SAP ERP and migration to SAP HANA in one step (and if required the conversion to Unicode). Already running the latest version of SAP ERP? Then the Software Provisioning Manager will be the migration tool of choice. During this 75-minute discussion, attendees will:</p> <ul style="list-style-type: none"> • Learn about the SAP Benchmarking tool, which can help estimate the required downtime for a Suite on SAP HANA migration. • Hear about the SAP Table Comparison tool which can help with data validation post-SAP HANA migration. • See the steps required to perform an SAP HANA migration with real-world screenshots from the Software Update Manager. • Learn about technical prerequisites that need to be in place before the Suite on SAP HANA migration. |
| <p>2:15 p.m. – 2:30 p.m.</p> | <p>Break</p> |
| <p>2:30 p.m. – 4:00 p.m.</p> | <p>Suite on SAP HANA Capabilities</p> <p>What good is a Suite on SAP HANA seminar if we don't show you how to activate and explore these newfound capabilities? In this</p> |

SAP HANA® AGENDA

| | |
|------------------------------|--|
| | <p>session, attendees will learn about the new capabilities which become available once we migrate to Suite on SAP HANA. We will explore the activation of SAP Fiori® and the SAP Smart Business applications. Dive into SAP HANA Live to showcase how SAP analytic tools can now access real-time transactional data. Learn about the functional enhancements available with SAP ERP on SAP HANA and how to find them. Attendees will:</p> <ul style="list-style-type: none">• Walk through example SAP Fiori Smart Business Applications, which can be installed with the Suite on SAP HANA migration to enable a better User Experience.• Learn about SAP HANA Live and ABAP CDS Views, which can provide real-time access to transactional data from a variety of SAP Analytical toolsets. <p>Understand what ERP transactions have been optimized with Suite on SAP HANA and how to find them.</p> |
| 4:00 p.m. – 5:00 p.m. | Q&A |
